

**Login Screen**  
This screen allows the user to input their username and password to sign into the app.

**View My Profile Screen**  
The personal profile screen allows the user to view their Profile pictures, information, and collections and to scan QR Code. As well as the map, friend, and switch buttons to switch the ranking list in the game.

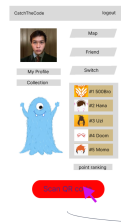

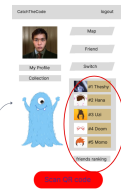

**Switch Button**  
The switch button allows the user to switch the type of the ranking list. The type of the ranking list will be shown below the list. There are 4 types of ranking lists, unique, point, friends, and collection ranking. The image above shows the unique ranking list (circled in red).

Friends ranking  
(Circled in red)

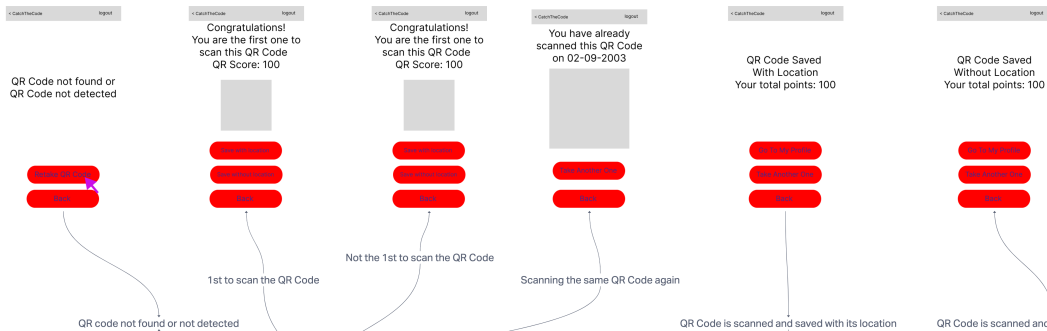

Point ranking  
(Circled in red)

Collection ranking  
(Circled in red)

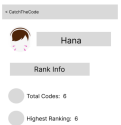

**Scan the QR Code button**  
The scan button allows the user to scan a QR Code and add it to their collection with their camera. Users can also retake the QR Code if it does not detect anything.

QR Code not found or QR Code not detected

**QR Code Information**  
After the user scanned the QR Code, there can be multiple messages shown on the screen regarding the status of the QR Code as shown above.

**Friend Search Screen**  
After the user click the "friend" button on the profile page and entered a username, the user could see their friends' information in the game.

**Permission Access**  
The APP will ask the user to grant the location on map for the first time.

**Map View Screen**  
The map view screen contains the location information of the QR Codes (Red pin) and the location of the user itself (Blue pin).

**Collection Page**  
This page shows the user's collection of QR Codes, as well as the user's current ranking worldwide, the highest points of the QR Code and the lowest points of the QR Code in the collection. The QR Codes are listed from the highest point to the lowest one. To see/add the comments to a QR Code just simply click on the QR Code image. To share the collection with others just simply click on the share button on the top right corner of the page.

**QR Code Comments**  
The user can write a comment and it will be posted under the QR Code just like any other comments from other players. To delete this QR Code from the collection, click the red delete button as shown above.

Click "Delete"

Click "Share"
